

Make data work for people's health!

A webinar for pioneers in data-driven health innovations

16 Sept 2019, 14:00 - 15:30 CET / 15:00 – 16:30 EET

Digitisation in health opens up tremendous perspectives for new data-driven services. **This webinar addresses how individual health data combined with data collected in health and social care will provide the fuel for innovation in the future.**

The implicit question is: **“What is Europe’s role in data economy and could maintaining trust be the biggest opportunity for Europe?”**

The promise is to leverage the synergies of huge data treasures and personal health and wellness data. For this to happen, **new fair data economy business models are needed to change the ability to create value, and deliver benefits for consumers, patients, healthcare professionals, industry and the society.**

Sitra and EHTEL are pleased to welcome you to this joint webinar around the IHAN approach for trustfully personalised health services. Sitra's IHAN® project aims to build the foundation for personalised wellbeing and healthcare services. It is a collaboration effort for European organisations.

Having been inspired by an EHTEL network meeting, we will inform on what IHAN is all about. What are building blocks for the IHAN rulebook like architecture, interoperability and trustful use? What are the core technical components including identity wallet, consent management and logging. How can these components be built according to IHAN requirements?

As an example, **My Travel Health – Tokyo 2020** will be presented: The pilot project aims to benefit all stakeholders – travellers get medical attention faster and more precisely; the provider's health data is securely exchanged with traveller's consent; and medical teams can quickly get trusted patient information in their own language.

Make data work for people's health!

A webinar for pioneers in data-driven health innovations

16 Sept 2019, 14:00 - 15:30 CET / 15:00 -16:30 EET

Agenda

Welcome and Practicalities <i>Saara Malkamäki, Specialist, Sitra</i>	14:00 CET [05']
The Fair Data Economy Promise: From registers to personal data <i>Jaana Sinipuro, Project Director, Sitra</i> Sitra's IHAN® project aims to build the foundation for personalized wellbeing and healthcare services. It is a joint collaboration effort for European organisations, and everyone is welcome to join. IHAN® ensures trust for new digital services and is founded upon European values.	14:05 CET [15']
<i>Questions and Answers</i>	14:20 CET [05']
From promise to practice: IHAN Architecture, requirements, functionality <i>Juhani Luoma-Kyyny, Leading Specialist, Sitra</i> As IHAN® is not a piece of software or an application but a new way to practice Data Economy, the architecture of IHAN is a collection of requirements rather than a technical specification. The basic components are identity of an individual, data associated to that individual and the consent of that identified individual granting access to the associate data.	14:25 CET [15']
<i>Questions and Answers</i>	14:40 CET [05']
Pilot project: My Travel Health <i>Perttu Prusi, Principal Solution Design Architect, Fujitsu</i> Utilizing national patient archives with citizen's consent to create value for all parties: individuals, public and private sector. Implementing IHAN compliant services and using IHAN blueprint as a guideline for design. My Travel Health application: growing stronger roots, robust frame and components.	14:45 CET [20']
<i>Questions and open discussion</i>	15:05 CET [05']
Conclusion delivered by EHTEL <i>Marc Lange, Secretary General, EHTEL</i> <i>Stephan Schug, Chief Medical Officer, EHTEL</i>	15:20 CET [10']
<i>Webinar session ends [15:30 CET / 16:30 EET]</i>	

[Sitra](#) is a Think-and-Do Tank that collaborates with partners from different sectors to research, trial and implement bold new ideas that shape the future. Sitra's IHAN® project aims to build the foundation for a new and fair data economy, where data will benefit all stakeholders: the individuals, the businesses and the society. IHAN demonstrates the journey from system-centred health care to human-driven and individual promotion of wellbeing.

[EHTEL](#) is the one multi-stakeholder organisation within Europe that brings together organisations and individuals engaged in all aspects of eHealth.
