A workshop hosted by **WoHiT 2016** CONFERENCE & EXHIBITION HIMSS Europe

on the project

Scirocco Scaling Integrated Care in Context

organised by

EHTEL EUROPEAN HEALTH TELEMATICS ASSOCIATION

Scaling Integrated Care in Europe – What does it take?

More tools are needed that can help us to understand how to move towards more sustainable health and care systems, and how to support implementation, scalability and transferability of integrated care solutions in Europe.

The objective of this workshop is to explore the SCIROCCO toolkit's potential to facilitate exchanges of good practice and the scaling-up of active and healthy ageing solutions in Europe (www.scirocco-project.eu). The workshop will demonstrate the development, validation and testing of the tool. It will show how the tool will build on the results of its application to 15 good practices in integrated care in five European regions. It will provide a unique opportunity to gain a more detailed insight into the parameters of the SCIROCCO online tool.

Main messages

- The SCIROCCO tool can help you to scale up your integrated care/active and healthy ageing solutions.
- Looking at example good practices can help you understand integrated care in your own region.
- Scaling up of integrated care requires understanding of the context in which successful practice emerges.

Practicalities: Monday 21 November 2016, 15:00 – 16:30

Co-funded by the Health Programme of the European Union

The SCIROCCO project is co-funded by the Health Programme of the European Union under Grant Agreement No.: 710033 (CHAFEA)

Scaling Integrated Care in Europe – What does it take?

Monday 21 November 2016, 15:00 – 16:30

Introduction to SCIROCCO project   15:00 – 15:20
By Marc Lange, EHTEL, Belgium

"The SCIROCCO project (www.sciroco-project.eu) will help European regions to understand how to move towards more sustainable health and care systems, and how to support implementation, scalability and transferability of integrated care solutions.

The project builds on the maturity model – B3 Maturity Model (B3-MM) – developed by the B3 Action Group on Integrated Care of the European Innovation Partnership on Active and Healthy Ageing (EIP on AHA) www.ec.europa.eu/eip/ageing/home_en"

Viability Assessment of Good practices in 5 European Regions   15:20 – 15:40
By Esteban de Manuel Keenoy, Kronikgune, Basque Country, Spain

The EIPonAHA has identified around 200 good practices from a diverse range of health systems across Europe. If these good practices are to be transferrable and adoptable by other health systems, we need a means to assess the viability of the practice and the maturity requirements of their environment. The SCIROCCO toolkit aims to support these assessment processes.

Understanding maturity requirements for eHealth in Norrbotten   15:40 – 16:00
By Lisa Lundgren, Norrbotten County Council, Sweden

"Much of our piloting is done where the need is the greatest and are adapted to the local contextual requirements without direct regard to scalability yet we see that by meeting the requirements of the most exposed and vulnerable we are able to scale much of what we do. By understanding our context requirements at an early pilot stage we create the most viable solutions. It is crucial to continue building knowledge on understanding maturity requirements in our region for developing, scaling and adopting more person-centered integrated care solutions"

Tool support for assessing the maturity of a health system   16:00 – 16:20
By Stuart Anderson, University of Edinburgh, Scotland

"Experience shows that tools such as the maturity model are best supported by computer-based tools. This tool will We present the initial version of such a tool for the B3 Maturity Model. We consider, the process the tool is intended to support, the role of evidence in the process, and support for negotiation. We also consider the development process for the tool, and prospective issues such as the extent to which the tool can span linguistic boundaries and how future versions of the tool will support twinning and coaching activity."

Q&A and closing   16:20 – 16:30
